

ARTIS

▶ ARTIS REVOLUTIONIZING REAL-TIME PAYMENT ON THE BLOCKCHAIN

While the price for cryptocurrencies may fluctuate, the blockchain technology behind them is here to stay. However, even the most innovative blockchains are grappling with quite a few challenges. When the team behind ARTIS analyzed the most innovative blockchains, it found great ideas and implementations – but also a myriad of false promises. The most obvious problems: Blockchains don't scale and use a lot of energy. With ARTIS, we have found a revolutionary way to tackle the scaling and energy-consumption obstacles, while finding a sweet spot within the Ethereum ecosystem.

▶ THE TEAM

ARTIS is developed by the lab10 collective eG, located in Graz, Austria. This cooperative, with more than 35 blockchain specialists and enthusiasts, is collaborating with leading research institutes and blockchain pioneers in the industry. Get the full picture of our team on www.artis.eco/team

▶ THE ARTIS SOLUTION

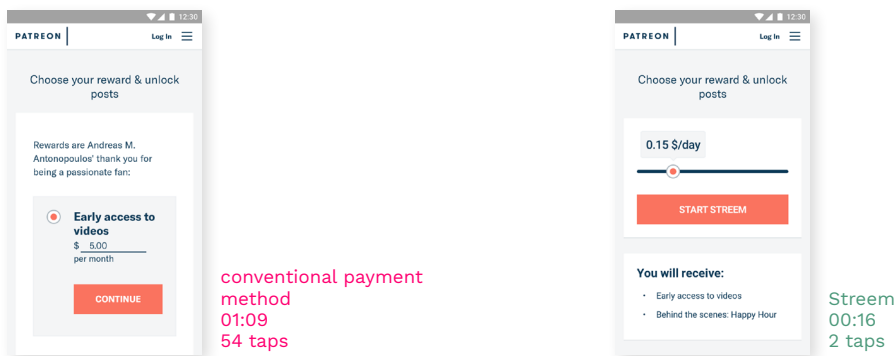

ARTIS is a highly energy-efficient, fast high-throughput blockchain, which brings a completely new dimension to the concept of money with its key feature 'Stream'. By providing simple and secure streaming money for millions of people, Streams not only implement, but even exceed the idea of real-time payment. As the Stream runs on the blockchain itself, ARTIS – unlike other blockchain solutions – can let money literally flow without any interruptions, while saving energy and not compromising on security or privacy.

ARTIS is a new, independent blockchain system and belongs to the Ethereum protocol ecosystem. Our eco-friendly and efficient blockchain can handle 200 to 2000 transactions per second – that's 10 to 100 times the capacity of the Ethereum blockchain. We achieve finality of transactions within seconds. ARTIS is 100% Ethereum smart contract compatible. The holistic network design of ARTIS stands out from all other blockchains, including Ethereum itself. ARTIS is not only a fast, energy- and cost-efficient blockchain, but considers security and privacy as equally important, hence provides solutions for these growing obstacles as well. Another key feature of the ARTIS blockchain is the 'self-sovereign identity', which puts people in charge of their own digital identities.

► USE CASES & APPLICATIONS OF ARTIS

As we move into a more mobile world, real-time experiences become the norm. Today, consumers want the same real-time experience from payment services as well and corporates are looking for ways to improve the client-experience. With real-time payment, commerce and economic activity can occur more quickly and efficiently, less expensively and with greater security. The ARTIS blockchain enables fast, transparent, secure and cost-efficient transactions, which is well-suited for the real-time paradigm shift.

Our key feature Streems take real-time payment to the next level. Streems are fast, frictionless and convenient and therefore fit perfectly with recurring payment business models. Businesses in the rapidly growing subscription-based market, which is estimated at 8 trillion US-Dollar and the pay-per-use market, can take full advantage of Streems. Streems enable anonymous 1-click-subscriptions, with which the users can conveniently start a Stream, while staying in full control of their digital identities.

► WHY INVEST IN ARTIS?

ARTIS is the most future-proof new blockchain that has been introduced and it will allow the disruption of all kinds of real-time payments and business models based on subscription and pay-per-use. You will appreciate the following details about what makes ARTIS a sound and promising venture: ARTIS will have 5 seconds transaction finality and will be able to handle 200 to 2000 transactions per second.

- The total market value of € 45m at the start of the project offers a potential increase in value over time
- The ATS token sale has a hard cap of € 22.5m and ARTIS will have a limited coin supply of 21bn ATS
- Fair and stable conditions for investors during this funding round until end of June.
(If there are further rounds, ATS tokens will be sold with a significant premium.)

The Public Sale of ATS tokens starts on May 31st, 2018. All ATS tokens will be converted to ATS coins once the ARTIS mainnet goes live end of 2018.

SECURE YOUR SHARE OF ATS COINS EARLY AND BENEFIT FROM THE HUGE POTENTIAL THE ARTIS BLOCKCHAIN OFFERS.
